

## HARDIER SUCCULENTS FOR SUNSET ZONES 14-16

### ALOES

*All these Aloes are able to take occasional temperatures down to 20-25 °F. However, sustained cold will most likely result in damage.*

Aloe buhrii  
Aloe castanea  
Aloe distans  
Aloe ferox  
Aloe glauca  
Aloe juvenna  
Aloe maculata (saponaria)  
Aloe marlothii  
Aloe polyphylla (10-15 °F, does not like sustained heat over 90 °F)  
Aloe striata  
Aloe x nobilis

### AGAVES

*Agaves vary greatly in hardiness; some are true tropicals while others inhabit the snowy mountains of the American Southwest. Many of the best garden-worthy species come from the high mountains of Mexico.*

Agave 'Baccarat' (large) 0 °F  
Agave americana (massive) 15-20 °F  
Agave bracteosa (small-medium) 10-15 °F  
Agave celsii var. albicans (medium) 20-25 °F  
Agave colorata (medium) 20 °F  
Agave deserti (medium) 5-10 °F NATIVE  
Agave filifera (including multifilifera, schidigera, x leopoldii) (small) 15-20 °F  
Agave franzosinii (massive) 15-20 °F  
Agave gentryi 'Jaws' (large) 5-10 °F  
Agave havardiana (large) -15 °F  
Agave lophantha 'Quadricolor' (small, clumping) 15-20 °F  
Agave murpheyi (medium) 5 °F  
Agave nickelsiae (small) 10-15 °F  
Agave ocahui (medium) 10-15 °F  
Agave ovatifolia (large) 10-15 °F  
Agave parrasana (small) 15-20 °F  
Agave parryi (medium) 15 °F  
Agave salmiana var. ferox (massive) 15-20 °F  
Agave striata (medium) 0-10 °F  
Agave toumeyana var. bella (small) 0 °F  
Agave victoriae-reginae (small) 10-15 °F  
Agave vilmoriniana (large) 20-25 °F  
Agave weberi (large) 20 °F  
Agave x 'Blue Glow' (medium) 20 °F  
Agave x 'Sharkskin' (medium) 20-25 °F  
X Mangave 'Macho Mocha' (small) 10-15 °F

### AIZOACEAE (and a few SENECIOS)

*Delospermas all will take 20 °F, or lower*

Delosperma 'Fire Spinner'  
Delosperma cooperi

Delosperma lavisiae  
Delosperma nubigenum  
Delosperma sutherlandii  
Oscularia deltoides  
Scopelogenia verruculata  
Senecio mandraliscae 20-25 °F  
Senecio serpens 20-25 °F

### CRASSULACEAE

*Mostly small plants, the species and hybrids listed here will take temps down to 25 °F, or even lower. But, some of the larger foliated Echeverias will suffer damage below 28 °F.*

Cotyledon orbiculata var oblonga 'Macrantha'  
Crassula falcata  
Crassula muscosa  
Crassula sarcocaulis  
Crassula tetragona  
Dudleya brittonii NATIVE  
Dudleya hassei NATIVE  
Dudleya pulverulenta NATIVE  
Echeveria 'Afterglow'  
Echeveria 'Imbricata'  
Echeveria 'Perle von Nurnberg'  
Echeveria 'Pulv-oliver'  
Echeveria 'Violet Queen'  
Echeveria agavoides  
Echeveria cante  
Echeveria elegans  
Echeveria secunda  
Echeveria subrigida

### ASSORTED WOODY PLANTS

*All of these species can take temps 20 °F and below.*

Calibanus hookeri  
Dasylirion quadrangulatum (longissimum)  
Dasylirion wheeleri  
Hesperaloe parviflora  
Hesperaloe funifera ssp. Chiangii  
Hesperaloe funifera  
Nolina microcarpa  
Nolina nelsonii  
Nolina texana  
Yucca decipiens  
Yucca elata  
Yucca faxoniana (carnerosana)  
Yucca gloriosa  
Yucca linearifolia  
Yucca pallida  
Yucca rostrata  
Hesperoyucca whipplei

#### San Ramon / East Bay

9885 Alcosta Blvd, San Ramon, CA 94583  
(ph) 925.829.6006 • (fx) 925.829.6009

#### Clements / Central Valley

16950 E. Liberty Rd, Clements, CA 95227  
(ph) 209.759.3003 • (fx) 209.759.3004

#### Petaluma / North Bay

499 Pepper Rd, Petaluma, CA 94952  
Opening 2017!

#### Morgan Hill / South Bay

1965 Tennant Ave, Morgan Hill, CA 95307  
Opening 2017!
